JUSTIN COPPOLA

justin.coppola@ufl.edu | (561) 961-9710 | LinkedIn | Portfolio

EDUCATION

University of Florida **Gainesville, FL**
Bachelor of Science in Electrical Engineering | GPA: 3.30 *May 2025*

- **Awards/Honors:** 2022 Dean's List, Order of the Eastern Star scholarship recipient, Mensa Society
- **Relevant Coursework:** Machine Learning Applications, SoC Design, Reconfigurable Computing, Microprocessor Applications, Digital Logic and Computer Systems, Hardware Security and Trust

TECHNICAL SKILLS

Programming: SystemVerilog, Verilog, VHDL, Python, C, C++, Assembly, MATLAB
Tools & Environments: Vivado, ModelSim, Verdi, Quartus, Cadence, Git, Linux (CLI), MATLAB, LTSpice, Altium
Hardware Design: RTL Design, FPGA Development, Testbench Creation, Assertion Verification, UVM
Software & Scripting: REST APIs, OAuth Authentication, Linux Automation, Bash/Python Scripting

PROFESSIONAL EXPERIENCE

Intel Corporation **Hillsboro, OR**
RTL Design Intern, An Analog IP Team *May 2024 – August 2024*

- Spearheaded the design of a new RTL sub-IP bridging debug and functional control interfaces for next-generation CPU designs, by reverse engineering legacy systems, enabling migration to industry-standard DFT tools
- Developed a comprehensive SystemVerilog testbench suite with in-line assertions, automated simulation flows using Linux shell scripting, and verification via Vivado and Verdi environments to enhance RTL validation
- Independently rebuilt critical IP tooling, replacing outdated Perl scripts with Python workflows used for parsing IP RDL metadata into user-friendly CSVs, enhancing internal IP deliverables across Intel business units
- Delivered a fully validated and documented RTL IP solution that accelerated internal testing cycles, reduced validation runtime, and enabled adoption of industry-standard DFT tools across multiple product lines

L3Harris Technologies **Palm Bay, FL**
Electrical Digital Design Engineering Intern *May 2023 – August 2023*

- Conducted comprehensive FPGA timing verification for a wideband processing card's SPI communication between the primary FPGA and peripheral devices, ensuring reliable satellite communication post-launch
- Simulated and optimized multilayer PCB signal integrity, mitigating reflection and overshoot and completed advanced FPGA verification training, specializing in testbench creation and clock domain crossing techniques

Element Solutions | MacDermid Alpha Electronics Solutions **Johns Creek, GA**
Research and Development – Electrical Engineering Intern *May 2022 – August 2022*

- Updated and enhanced technical datasheets through ASTM and MIL-STD quality control testing on semiconductor and circuit card manufacturing materials, driving greater customer confidence and product sales
- Identified potential performance improvements that informed next-generation R&D product initiatives

PROJECTS

MIPS Processor (32-bit CPU) | VHDL, FPGA Prototyping *Spring 2023*

- Designed a fully functional 32-bit MIPS processor supporting arithmetic, memory access, and branching operations, verified with exhaustive VHDL testbenches and deployed onto FPGA hardware
- Leveraged ModelSim tools for functional verification, optimizing the datapath for minimal latency

Autonomous Car SoC System | SystemVerilog, Python, OpenCV *Spring 2024*

- Led SoC design and integration for an autonomous car, developing an image processing pipeline in Python with OpenCV for lane detection and SystemVerilog-based motor control logic, enabling real-time vehicle navigation
- Translated processed sensor input into autonomous motor control actions through state machines

Pong Game on FPGA (Pynq-Z2 Board) | SystemVerilog, HDMI Video Output *Spring 2024*

- Built a fully playable Pong game using SystemVerilog featuring ball movement, collision detection, paddle control, and real-time scoring updates displayed over HDMI using timing synchronization for seamless input

LEADERSHIP AND INVOLVEMENT

Theta Tau Professional Engineering Organization **Gainesville, FL**
Leadership Chairman *December 2021- Present*

- Organized high-visibility engineering organization events focused on risk management, inclusivity and professional development, and mentored successive leadership cohorts ensuring continued success
